

SEQUENCE 8.3.3.2

Issue Date: 08 Nov 2017

Introduction

This is an update for Sequence v8.3.3, which resolves a bug in the Task due date calculation, as detailed below.

Resolved Issue

When the Task due date value uses a calendar with the working time checked, the returned result is not accurate.

Resolution: Database code was fixed to include working times.

Update Steps

Update from v8.3.3.1:

1. Backup your Sequence Database.
2. Run the `PatchSynchronization_Data.sql` script on your Sequence Database.
3. Run IISReset.
4. Make sure the following files and folders are on the same level in the server.
 - GAC
5. Deploy `PNMsoft.Sequence.dll` to all servers' GAC (Global Assembly Cache).
6. Run IISRESET for the change to take effect.

Note: If you are running a Sequence version earlier than v8.3.3.1, you must install v8.3.3.1 before you install v8.3.3.2.
